Gentlemen:

We are offering the following stock for Fall shipment. Note that quantities are listed as stock is limited. We shall accept orders as they are received until the stock is exhausted. Requests for Spring shipment will be considered after those for Fall.

All stock is offered subject to prior sale and is liable to be unsold due to crop failure, inclement weather, drought, fire, freezing, etc. All stock offered is of the best grade and will be carefully packed in boxes, crates or packages to insure safe arrival.

All orders are shipped at the risk and cost of the purchaser. Shipment will be made when stock is ready and in order of receipt of orders. Special requests will be followed when possible.

All orders must be accompanied by cash or a 25% deposit with remainder prior to shipment. All prepaid orders will be packed free of charge. Our free packing is your discount. When ordering less than 25 of a variety (except when there is a limit of 25 or when a quantity of 100 or less is listed) add 15% to the list price.

Where limits are listed, only that limited quantity may be ordered. Those items marked with an asterisk (*) may not be ordered exclusively but only when other items listed are also ordered. We believe this a fair way to spread these good items among our customers.

Thank you for listening.

Very truly yours,

JOHN VERMEULEN & SON, Inc.

For Spring ~ 1947

Only a few items are being listed this Fall. Many others will be listed on our Spring list which you may look for around February.

ACER PAL. BURGUNDYLACE. Our own introduction. A natural cross and fast grower. As hardy as any here. An impressive Burgundy-red color with beautifully laced foliage.

Grafts Limit— 25 each \$ 1.25

AZALEA HINO-CRIMSON

2 1/4 p. Limit—250 per 100 25.00

PIERIS JAPONICA 2 1/2 p. Limit—250 per 100 25.00

TAXUS — Tall, narrow, hardy yews which were introduced by us in the Spring of this year. Tested since 1932 for growing habits and hardiness. 2 1/4" pot, Limit—25 of each variety, each \$.35.

MEDIA PILARIS (Pillar Yew). Long, narrow, medium-dark needles. Narrow growing habit. Short, upward sloping branches.

MEDIA PILARIS GRANDIFOLIA (Bigleaf Yew). Exactly similar in shape and growth as *Pilaris*, but the needles are enormous, almost as large as *Sciadopitys*. The effect is rich and unusual.

MEDIA PYRAMIDALIS (Pyramid Yew). A fast growing yew with vertical branches and striking black-green needles. Truly a rich, showy, full-bushed column.

MEDIA PYRAMIDALIS ROBUSTA (Obelisk Yew). Similar to *Pyramidalis*, but heavier branched. The needles are large and more glossy.

MEDIA STRICTA (Narrowbush Yew). The needles are short and thin, giving a compact effect which the almost vertical branches and dwarf, narrow shape augments.

MEDIA STRICTA VERIDIS (Grassgreen Yew). Similar in every way to *stricta*, except the needles, which are larger and gay, bright green, both Winter and Summer.

				per 100	per 1000
TAXUS	<i>Cuspidata</i>	rtd ctgs	6- 8"	\$ 8.50	\$ 80.00
